

Quentin McClellan

Platform / DevOps Systems Builder

Pennsylvania | quentinmcclellan.com | contact@quentinmcclellan.com | github.com/qmcclellan | linkedin.com/in/quentinmcclellan

SUMMARY

Platform / DevOps systems builder with hands-on Linux, Docker Compose, workflow automation, and operations discipline. Creator of StarkGrid, a private MVP/demo-ready proof platform demonstrating governed ingestion, service checks, evidence capture, and source-backed validation.

TECHNICAL SKILLS

- **Platform:** Linux, Docker Compose, SSH, Tailscale, NFS, service checks
- **Automation:** Bash, Python, Git/GitHub/Gitea, n8n, Maven
- **Observability/Data:** Athena Observer, Kafka/Redpanda checks, JSON evidence, source-backed search
- **Development:** Java, Spring, JavaScript/TypeScript familiarity

FEATURED PROJECT: STARKGRID

Private MVP/demo-ready governed ingestion and operational evidence platform

- Built a governed ingestion and operational evidence platform for deterministic workflow validation, service checks, runbooks, and public-safe proof; no production customer claim.
- Validated proof path: Hecate policy gate → Friday n8n → Jarvis benchmark harness → Athena/Search evidence.
- Final Rocketbook proof: [rocketbook-20260603T014846Z](#); Search sourceBacked/documents: 1842.
- Captured Ultron GTX 1080 remote GPU-capable worker evidence from athena-runtime-plans-recent; caveat: GPU OCR and embeddings were intentionally not enabled, so this is not a production GPU OCR acceleration claim.

PROFESSIONAL EXPERIENCE

Founder & Consultant / Creator — StarkGrid

Jul 2024 – Present

- Built and operated a private Linux/Docker Compose lab with Java/Spring/Maven services, Python/Bash automation, Redpanda/Kafka checks, n8n workflows, Athena observability, and source-backed search evidence.
- Produced runbooks, validation checks, caveats, and sanitized proof so reviewers can evaluate system behavior without unsupported claims.

Operations — FedEx

Jul 2022 – Jun 2026

- Supported reliable logistics execution through accurate status handling, repeatable handoffs, process discipline, and practical troubleshooting under time-sensitive operating conditions.

Floating Meat Manager — Price Chopper Supermarkets-Market 32

Jul 2018 – Apr 2022

- Coordinated cross-store execution with inventory/shrink awareness, vendor and team handoffs, quality standards, and process improvements in customer-facing operations.

Additional Operations Experience

Azar Displays — Fulfillment, Jul 2021 – Sep 2021; White Haven Market — Butcher, Sep 2019 – Jul 2020.

EDUCATION

Colorado Technical University — Bachelor of Science, IT Software Engineering, 2016–2019; GPA: 3.59
